

An Introduction to knitr

Yihui Xie

June 21, 2013

The **knitr** package (Xie, 2013) is an alternative tool to Sweave based on a different design with more features. This document is not the real vignette, but only serves as a placeholder to guide you to the real manuals of this package. You can find them in the package website: <http://yihui.name/knitr>¹, and remember to read the help pages of functions in this package.

Anyway, here is a code chunk that shows you can compile vignettes with **knitr** as well by using a proper Makefile (see <http://yihui.name/knitr/demo/vignette/>):

```
rnorm(5)

## [1] -0.61839 -0.91681  1.15873  0.02161 -1.65873

df = data.frame(y = rnorm(100), x = 1:100)
summary(lm(y ~ x, data = df))

##
## Call:
## lm(formula = y ~ x, data = df)
##
## Residuals:
##      Min       1Q   Median       3Q      Max
## -2.2006  -0.5896   0.0489   0.7328   1.8599
##
## Coefficients:
##              Estimate Std. Error t value Pr(>|t|)
## (Intercept)  0.001435   0.190233    0.01   0.99
## x           -0.000597   0.003270   -0.18   0.86
##
## Residual standard error: 0.944 on 98 degrees of freedom
## Multiple R-squared:  0.00034, Adjusted R-squared:  -0.00986
## F-statistic: 0.0334 on 1 and 98 DF,  p-value: 0.855
```
