

# An Introduction to knitr

Yihui Xie

June 7, 2013

The **knitr** package (Xie, 2013) is an alternative tool to Sweave based on a different design with more features. This document is not the real vignette, but only serves as a placeholder to guide you to the real manuals of this package. You can find them in the package website: [`http://yihui.name/knitr`](http://yihui.name/knitr)<sup>1</sup>, and remember to read the help pages of functions in this package.

Anyway, here is a code chunk that shows you can compile vignettes with **knitr** as well by using a proper Makefile (see <http://yihui.name/knitr/demo/vignette/>):

```
rnorm(5)

## [1] -1.0271  1.4467  0.2240  0.7703 -0.3924

df = data.frame(y = rnorm(100), x = 1:100)
summary(lm(y ~ x, data = df))

##
## Call:
## lm(formula = y ~ x, data = df)
##
## Residuals:
##      Min       1Q   Median       3Q      Max
## -2.5471 -0.6963  0.0464  0.6214  3.1183
##
## Coefficients:
##              Estimate Std. Error t value Pr(>|t|)
## (Intercept) -0.22738    0.21535   -1.06    0.29
## x           0.00349    0.00370    0.94    0.35
##
## Residual standard error: 1.07 on 98 degrees of freedom
## Multiple R-squared:  0.00901, Adjusted R-squared:  -0.0011
## F-statistic: 0.891 on 1 and 98 DF,  p-value: 0.348
```
